A JPG file can be constructed in such a way to allow the user to view the file in many different palettes. However, it is not possible to embed the colors from an EPS file in a JPG file. And, when it comes to saving the results, you should make sure that you have a JPG file that is smaller than the original EPS file, because increasing the number of pixels can significantly affect the operation. You can use almost any application that is available on your computer to convert one EPS file to a JPG file. But if you want to save a lot of time, you should not use the built-in utilities. The p53 tumor suppressor gene is one of the most frequently mutated genes found in many human cancers. Previous studies on the p53 inactivation in cell cycle progression may have overlooked the function of other genes. We discovered the requirement of the cis-regulatory system of the p53 gene in cell cycle progression. Stable cell lines that inactivate the p53 gene by transfection with a plasmid containing a mutant form of the p53 gene were synchronized in S phase by culturing in methionine-free medium. Inactivation of the p53 gene by the transfection of the mutant form of the p53 gene resulted in the delay of progression through the G2-M phase after release from the methionine-free medium. The p53 target genes responsible for the delay were examined. Suppression of expression of cyclin A, cyclin B, and cdc2 but not of p21, resulted in delayed progression through the G2-M phase. The loss of p53 activity did not alter the G0-G1-S phase transition in the cell cycle. Analyses of kinetics of p53 protein accumulation and various cell cycle regulatory factors suggested that p53-induced delay in the G2-M progression was due to inactivation of cyclin B-cdc2 kinase complex after p53 induction. The p53 target genes that delayed the cell cycle progression were identified by a chromosomal array approach. These genes were linked to cell cycle progression by analyzing expression of the genes in synchronized cells with and without p53 inactivation.Strongyloides infection.
